SUMMARY

Aspiring Data Analyst with hands-on experience in **SQL, Python, Excel, and Power BI**, skilled in dashboard development, reporting automation, data cleaning, KPI analysis, and business reporting. Experienced in operational data analysis, validation, and visualization, with strong analytical problem-solving abilities and interest in automation workflows and data-driven decision-making.

TECHNICAL SKILLS

Programming Languages: SQL, Python (Pandas, NumPy)

BI & Visualization Tools: Power BI (Dashboards, DAX, Power Query, Data Modeling), Excel (Advanced Excel, Pivot Tables, VLOOKUP, XLOOKUP, Power Query), PowerPoint, Tableau

Databases : PostgreSQL, MySQL, AWS S3

Data Handling: Data Cleaning, ETL, EDA (Exploratory Data Analysis)

Analytics & Reporting: KPI Reporting, Statistical Analysis, Trend Analysis, Root Cause Analysis, Data Quality Management, Automated Reporting, Data Visualization & Storytelling

Tools: SQL Workbench, pgAdmin, GitHub, ServiceNow, Jupyter Notebook, Google Sheets, Generative AI (ChatGPT, Claude)

Soft-Skills: Stakeholder Communication, Requirement Gathering, Analytical Problem Solving, Attention to Detail, Cross-functional Collaboration, Analytics Solutions

EXPERIENCE

Data Analyst Intern

Oct 2025 – Dec 2025

NullClass Private Limited

Bengaluru, India

- Gathered, cleaned, and analyzed datasets using Python, Excel, and Google Sheets to support analytics and reporting needs.
- Developed 3+ Power BI **dashboards** to visualize 10+ KPIs including **trend analysis** and business performance metrics, enabling faster data-driven decisions for stakeholders.
- Performed structured Data Analysis and documentation of insights, translating analytical outputs into actionable recommendations, improving reporting clarity and usability across 2+ stakeholder teams.
- Performed 3-stage data validation checks across all datasets, maintaining 98%+ data consistency and accuracy across all published reports.

Analyst I – Infrastructure Services

June 2020 – July 2024

DXC Technology

Bengaluru, India

- Analyzed and validated **500K+** operational records using **Excel and SQL**, improving reporting accuracy by 20% across infrastructure reporting workflows.
- Built **10+ Excel dashboards** and KPI reports using **Pivot Tables** and **Power Query**, enabling faster operational and SLA performance monitoring.
- Performed structured audit checks and **data validation** activities, maintaining **99% data accuracy** across recurring business and operational reporting deliverables.
- Supported migration of **100K+** infrastructure records from on-premises systems to **AWS S3**, ensuring secure and reliable reporting accessibility.
- Automated recurring reporting workflows using advanced Excel functions, reducing manual reporting effort by 25% and improving reporting turnaround time.
- Maintained detailed **Documentation** frameworks and collaborated with **3+ cross-functional teams** to support reporting governance, scheduled refresh reliability, and standardized analytics delivery processes.

Front End Developer

Jun 2019 – Nov 2019

MCware Technologies

Bengaluru, India

- Managed full website development life cycle: designing, developing, testing, and deploying web features within deadlines.
- Designed and deployed interactive web applications using HTML, CSS, and JavaScript.
- Collaborated with internal teams to translate requirements into functional solutions, improving usability and interface performance.

PROJECTS

End-to-End Automated Sales Analytics | *(Python, SQL, PowerBI, SQLAlchemy, PostgreSQL(NeonDB), Github-Actions)* [Link](#)

- Enabled real-time business decision-making by delivering automated Power BI dashboards connected to a live PostgreSQL database.
- Automated ETL pipeline reducing manual reporting time from **3+ hours to under 1 minute**.
- Improved data reliability and consistency by implementing a fully automated ETL pipeline, eliminating manual data handling and spreadsheet dependency.
- Ensured **100% pipeline reliability** using GitHub Actions-based automation, resulting in zero refresh failures and uninterrupted analytics availability.

Customer Trends Data Analysis | *(SQL, Python, Power BI, DAX, Data Modeling, Visualization)* [Link](#)

- Analyzed revenue, discount impact, and purchasing behavior using PostgreSQL, identifying high-value customer segments and revenue-driving factors such as express shipping and discount usage.
- Performed customer segmentation and retention analysis based on purchase history, subscription status, and age groups, revealing that 73% non-subscribers represent high subscription growth potential and that ages 25 - 40 contribute the highest revenue..
- Discovered returning customers purchase **5× more** than new users, enabling targeted retention strategy.

Bank Loan Dashboard | *Power BI, DAX, Data Modeling, Visualization* [Link](#)

- Built an interactive Power BI dashboard to analyze KPIs like loan status, funded amount, and interest rate.
- Designed DAX measures to compute key metrics (average loan rate, performance breakdown).
- Designed executive dashboards to track KPIs and loan data, ensuring data integrity and usability for financial reporting.

CERTIFICATIONS

Participated in a national-level India AI Summit -Buildathon Feb 2026 *HCL GUVI* India

Data Science & Artificial Intelligence Feb 2025 – Aug 2025 *Boston Institute of Analytics* Mumbai, India

EDUCATION

Dayananda Sagar College of Engineering Bangalore Jun 2017 – Sep 2020 *Bachelor of Engineering in Computer Science* Bangalore, India

AWARDS & ACHIEVEMENTS

- DXC H23 Collab Award – Recognized for high-quality delivery and operational excellence.
- FY-22 Q3 Champs Award – Star Performer of the Account.
- Mentored junior team members, improving analytical understanding and team productivity.
